

**INTEGRATED BLOOD CIRCUIT FOR SIMPLICITY
– IN JUST ONE MOVE**

As a pioneer and leading innovator in dialysis therapy, we present the **Artiset** blood tubing system that raise treatment quality, staff satisfaction and operational efficiency compared to conventional blood tubing systems.

The **Artiset** blood tubing system is an exclusive blood circuit designed to work with the **Artis Physio Plus** system. Compared with conventional bloodlines, the compact and highly integrated design offers various important advantages both from a medical and handling perspective.

ON-LINE HDF/HF IN PRE/POST DILUTION – ARTISET BLOOD TUBING SYSTEM

TREATMENT MODALITY	CODE	DESCRIPTION	STERILIZATION	PIECE/BOX
Hemodiafiltration pre and postdilution	955077	Artiset Prepost	Gamma radiation	20
Hemofiltration predilution	955077	Artiset Prepost	Gamma radiation	20
Hemodiafiltration postdilution	955075 955549	Artiset HD DNL HC	Gamma/Beta radiation Beta radiation	20

ACCESSORY

CODE	DESCRIPTION	STERILIZATION	PIECE/BOX
955599	Ultraline HDF	Beta radiation	40
955599	Ultraline HDF	Beta radiation	40
955599	Ultraline HDF	Beta radiation	40

Note: A contingency stock of saline priming bags is recommended in case **Ultra** Prime function cannot be used.

RECOMMENDED SPARE ACCESSORIES

INTENDED USE	CODE	ACCESSORY	STERILIZATION	PIECE/BOX
Connector to pause treatment	114376	Evaclean rinse-backconnector	Ethylene Oxide	150
Infusion line for saline priming with Artiset Prepost	107472	Infusion line SP-339G	Beta radiation	60

For the safe and proper use of the devices referenced within, refer to the complete Instructions for Use.

ARTISET BLOODLINES
for the **Artis Physio Plus** system

HEMODIALYSIS

Hemodialysis Double Needle Artiset HD DNL HC

The Artiset HD DNL HC blood tubing system for double-needle hemodialysis treatment includes:

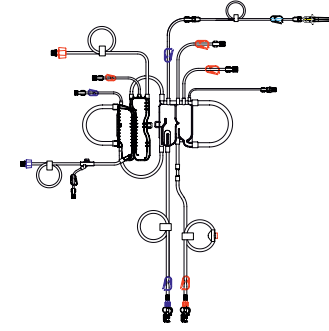

- The **Hemoscan** cuvette to measure blood volume variations, enabling the **HemoControl** modality. For double-needle hemodialysis only
- A connector on the venous dialyzer line for **Ultra Prime** function
- A pre-connected infusion line for saline priming

Hemodialysis Single Needle Artiset HD SN HC

The Artiset HD SN HC blood tubing system for single-needle hemodialysis treatment includes:

- The **Hemoscan** cuvette to measure blood volume variations
- The arterio-venous expansion chambers for effective single-needle mode
- A connector on the venous dialyzer line for **Ultra Prime** function
- A pre-connected infusion line for saline priming

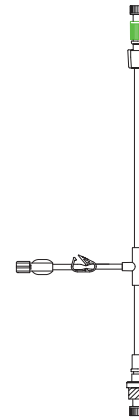

On-line auto-priming Ultraline HD

The one-button priming can be performed with on-line produced fluid using the **Ultraline HD** simply connected to the Ultra port. The **Ultraline HD** is intended for priming, bolus and rinseback in Hemodialysis (HD) Double Needle (DN) and Single Needle (SN) treatments with infusion fluid delivered on-line by **Artis Physio Plus** dialysis machine. Storage and transportation of priming bags is no more necessary.

This bloodline accessory is dedicated for the **Ultra Prime** function in hemodialysis treatments, to be used in combination with the **Artiset** Bloodline range and include:

- The T-connector for rinse-back to facilitate the rinse-back operation

ARTISET BLOOD TUBING SYSTEM FOR HD TREATMENT

PRODUCT DESCRIPTION	ARTISET HD DNL HC	ARTISET HD SN HC
Product code:	955075, 955549	114533
Volume (ml):	132	227
Shelf life:	3 years	3 years
Sterilization:	Gamma/Beta radiation	Gamma radiation
Units per box:	20	7

MATERIALS

Tubing:	PVC polyvinyl chloride (medical grade, DEHP-free)
Cassette body:	PETG polyEthylene Terephthalate Glycol
Injection site:	Latex-free rubber

ACCESSORY

PRODUCT DESCRIPTION	ULTRALINE HD
Product code:	955600
Volume (ml):	n.a.
Shelf life:	3 years
Sterilization:	Beta radiation
Units per box:	80

MATERIALS

Tubing:	PVC polyvinyl chloride (medical grade, DEHP-free)
---------	---

PERFORMANCES

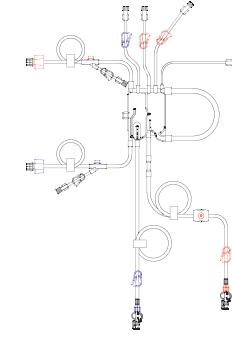

Max. infusion vol.:	15 l.
---------------------	-------

ON-LINE HDF – HF IN PRE/POST DILUTION

HDF pre or postdilution HF predilution Artiset Prepost

The Artiset Prepost blood tubing system for double-needle hemodialysis, HDF pre and postdilution, or HF predilution treatment includes:

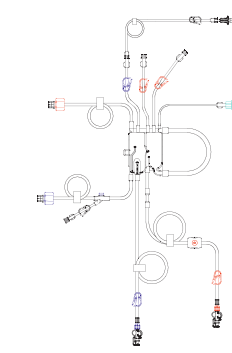

- The **Hemoscan** cuvette to measure blood volume variations, enabling the **HemoControl** modality
- A connector on the venous dialyzer line for **Ultra Prime** function

HDF postdilution Artiset HD DNL HC

The Artiset HD DNL HC blood tubing system for double-needle hemodialysis, HDF post dilution treatment includes:

- The **Hemoscan** cuvette to measure blood volume variations, enabling the **HemoControl** modality. For double-needle hemodialysis only
- A connector on the venous dialyzer line for **Ultra Prime** function
- A pre-connected infusion line for saline priming

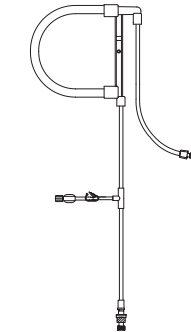

ON-LINE substitution fluid Ultraline HDF

The **Ultraline HDF** for Haemodiafiltration (HDF) Double Needle treatment in pre or post dilution modality and Hemofiltration (HF) Double Needle treatment in pre dilution modality together with on-line priming, bolus and rinseback of the blood circuit using infusion/substitution fluid delivered by **Artis Physio Plus** dialysis machine.

This bloodline accessory is dedicated for on-line modalities, to be used in combination with the **Artiset** range and includes:

- A combi-connector for auto-loading and unloading operation
- The T-connector for rinse-back to facilitate the rinse-back operation

ARTISET BLOOD TUBING SYSTEM FOR HDF AND HF TREATMENT

PRODUCT DESCRIPTION	ARTISET HD DNL HC/ARTISET PREPOST
Product code:	955075, 955549/955077
